INTRODUCTION

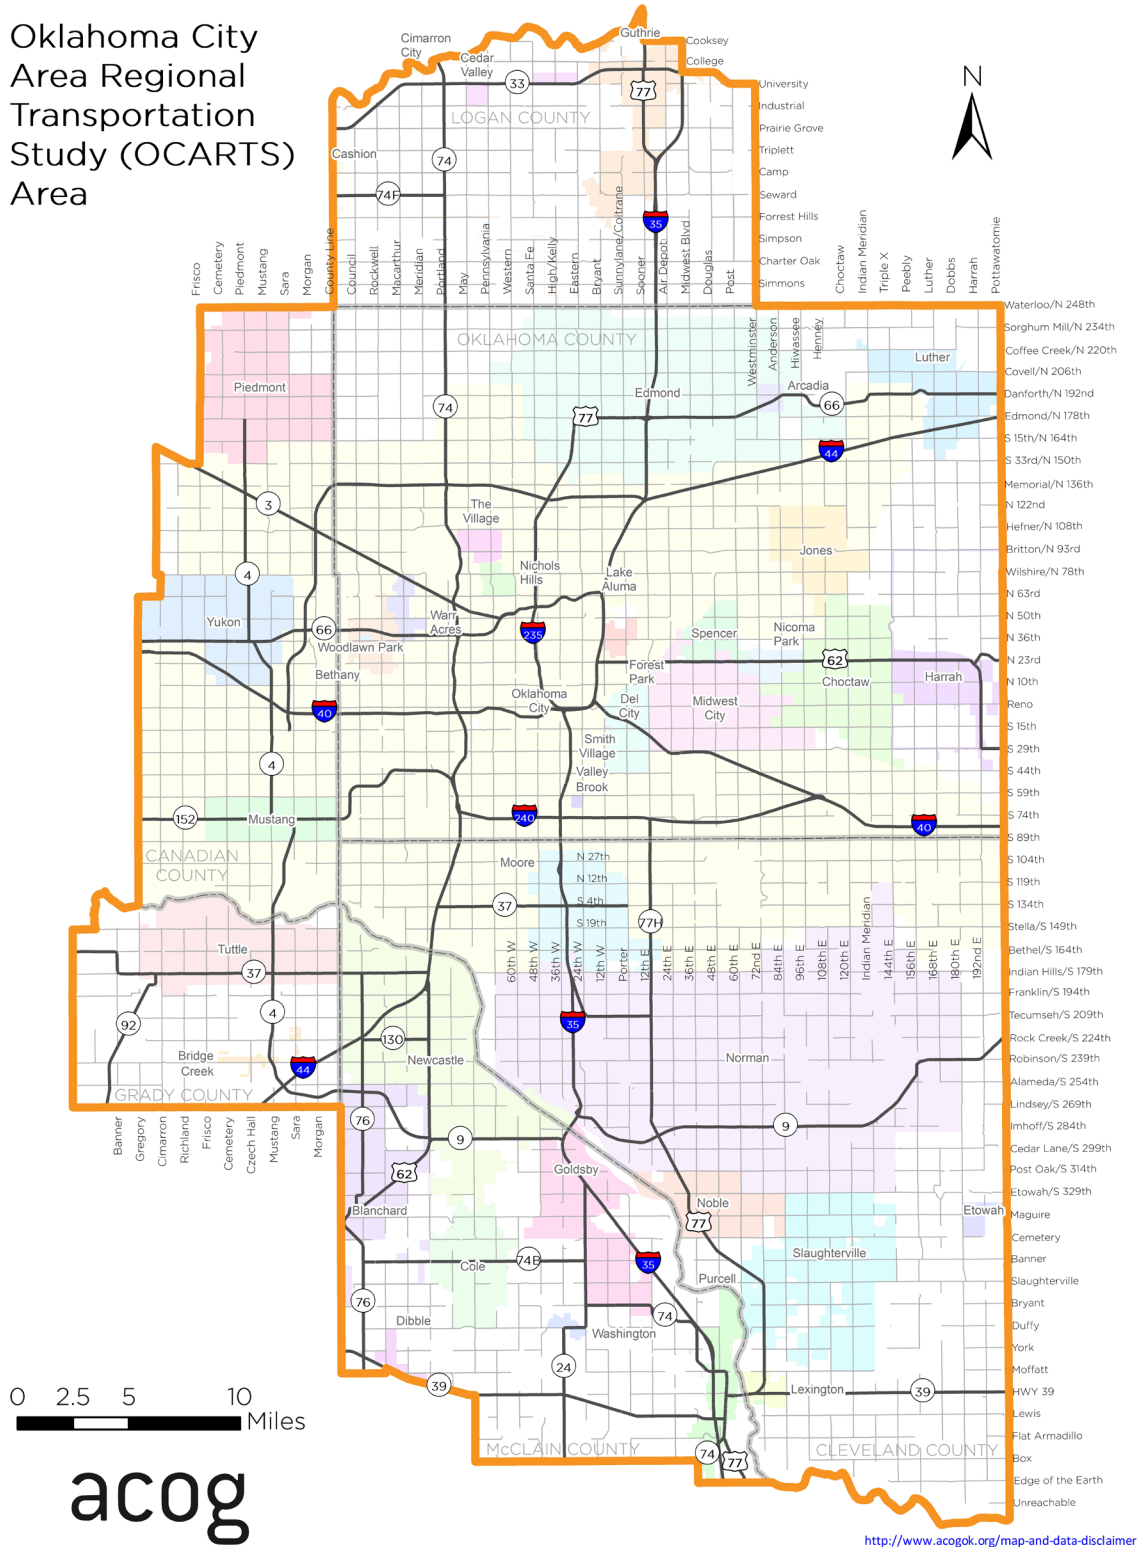

This report provides a summary of the procedures used to gather and analyze school enrollment data for educational institutions in the Oklahoma City Area Regional Transportation Study (OCARTS) area. The base year for this analysis is 2015 and the horizon year is 2045. The goal is to document the 2015 enrollment and in a future report, use that data, along with regional population forecast and other factors, to compute estimates of enrollments in the 2045 horizon year.

The school enrollment data was compiled for four different categories of education. The categories include public schools (pre-kindergarten through twelfth grades), private schools (pre-kindergarten through twelfth grades), vocational-technical schools, and university and college education.

The information was collected for the above-mentioned types of academic institutions within the OCARTS area (see [Figure 1](#)), which includes Oklahoma and Cleveland Counties and portions of Canadian, Logan, McClain, and Grady Counties.

Oklahoma City Area Regional Transportation Study (OCARTS) Area

METHODOLOGY FOR BASE YEAR 2015 SCHOOL ENROLLMENT

The Association of Central Oklahoma Governments (ACOG) serves as the Metropolitan Planning Organization (MPO) for the OCARTS area and is therefore responsible for the gathering, maintaining, and analyzing the socioeconomic data necessary for transportation planning.

To obtain base year enrollment data, the MPO staff used several sources, including the Oklahoma State Regents for Higher Education, the National Center for Education Statistics, and local news articles.

METHODOLOGY FOR GEOGRAPHIC INFORMATION SYSTEMS (GIS) COMPONENT

One of the primary components of the past 2010 school enrollment project was the creation of a geodatabase containing school districts and school feeder boundaries. These same boundaries were used for the 2015 update. The schools, colleges, and universities that had been address-matched in the 2010 update were used for 2015. In some cases, additional new facilities were added and closed facilities were deleted.

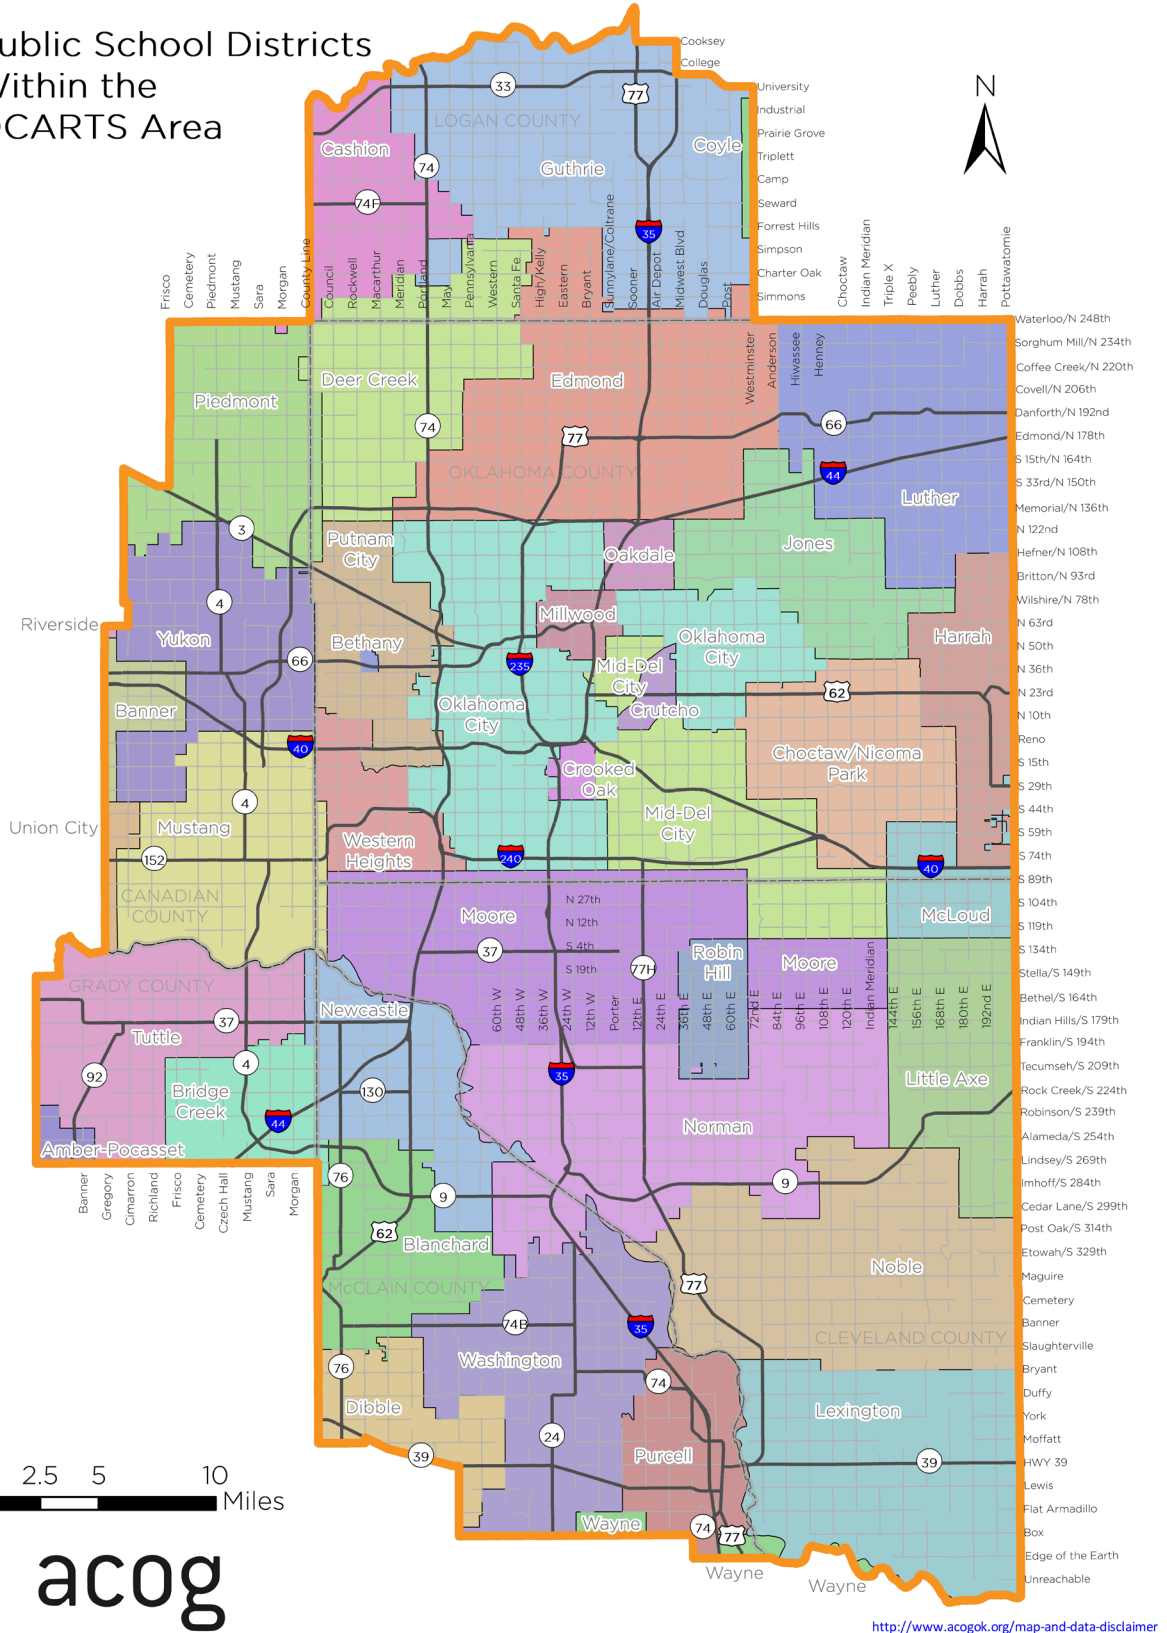

PUBLIC SCHOOL ENROLLMENT

Base data for public school enrollment in 2015 for pre-kindergarten through twelfth grade were obtained in large part from the Oklahoma State Department of Education and various other sources. Supplemental data was obtained from Google Maps.

Using this information, a database containing the school district, city, school name, grades, enrollment, and district enrollment for each public school was created (see [Figure 2](#) and [Table 1](#)). New schools were added between 2010 and 2015. In some cases, the grades of schools were designated, or reclassified to adapt to population growth in the school district. Oklahoma City Public Schools also added charter schools within that same time period.

PRIVATE SCHOOL ENROLLMENT

Only accredited private schools are required to furnish enrollment data to the Oklahoma State Department of Education. As a result, several sources were used to name, locate, verify existence, confirm grade levels, and obtain enrollment figures for private school enrollment in 2015. Along with data obtained from the National Center for Education Statistics, ACOG staff used the data from the “Private Schools in OKC Area” published by The Journal Record.

Using this information, a database containing city, school name, grades, and enrollment data for each private school was developed (see [Table 2](#)).

HIGHER EDUCATION INSTITUTIONS

School enrollment figures for universities and colleges in the OCARTS region were obtained from the Oklahoma State Regents for Higher Education. Using this information, a database containing city, school name, type, and enrollment for each university and college was created (see [Table 3](#)).
