## INTRODUCTION

Within the Oklahoma City Area Regional Transportation Study (OCARTS) Transportation Management Area (TMA), physical improvements to the transportation network are implemented on a continual basis by municipal and county governments and the Oklahoma Department of Transportation (ODOT). These improvements are funded by a variety of federal, state, and local sources, with the ultimate goals of increased network capacity to meet travel demand, improved safety, and reduced congestion for the motoring public. By accomplishing these goals, network improvements also make a positive contribution to improved air quality by alleviating recurring congestion in the metropolitan area.

The purpose of the network monitoring report is to document the implementation of completed transportation projects. The network monitoring database provides useful information on the location and timing of completed projects. This information can be used to assist in the preparation of other studies, such as crash analyses, update of the regional functional classification file, and monitoring implementation of the long-range metropolitan transportation plan (MTP).

This report contains network improvements completed between January 1, 2019 and December 31, 2019. The data includes information on locations and timing of capacity improvements and new construction for the arterial street network and highway system located within the Central Oklahoma region. A detailed map depicting capacity improvements to the arterial street and highway network in the OCARTS area accompanies this section. In addition, the report includes information on Transportation System Management (TSM) improvements, such as signalization projects, signalization and channelization projects, bridge improvements, and railroad crossing protection projects. Finally, the network monitoring report also documents improvements implemented for other modes of transportation, such as transit, bicycle, and pedestrian facilities.

It is important to note that, while a survey is sent out to every member entity, the only entities that provided project information to ACOG included the Cities of Edmond, Harrah, Midwest City, Moore, Norman, Oklahoma City, The Village, the Town of Luther, McClain County, Oklahoma County, transit agency COTPA, and transit agency Norman.

## RESULTS

### LIMITED ACCESS FACILITIES WITH INCREASED CAPACITIES AND INTERCHANGES

There were no reported improvements to Limited Access Facilities regarding increased capacities in Calendar Year (CY) 2019.

### LIMITED ACCESS FACILITIES WITH NEW CONSTRUCTION

No new construction regarding Limited Access Facilities was reported in CY 2019.

### ARTERIAL STREETS AND HIGHWAYS

In CY 2019, 73 sections (155.99 miles) of arterial streets and highways were resurfaced. There were 6 major streets that had sections widened with a total combined distance of 4.75 linear miles, resulting in an increased network capacity of 6.9 lane miles for the OCARTS area. This information is shown in [Table 1](#) and [Figure 1](#).

### TRANSPORTATION SYSTEM MANAGEMENT (TSM) IMPROVEMENTS

Numerous TSM improvements were also implemented in 2019 throughout the OCARTS area by various local governments. The improvements included signalization and channelization projects, ITS projects, bridge improvements, and a railroad crossing project. These improvements will contribute to more efficient traffic flow and increased network safety throughout the OCARTS area. A detailed list of the TSM improvements is included in Tables 1 through 5.

### INTERMODAL IMPROVEMENTS

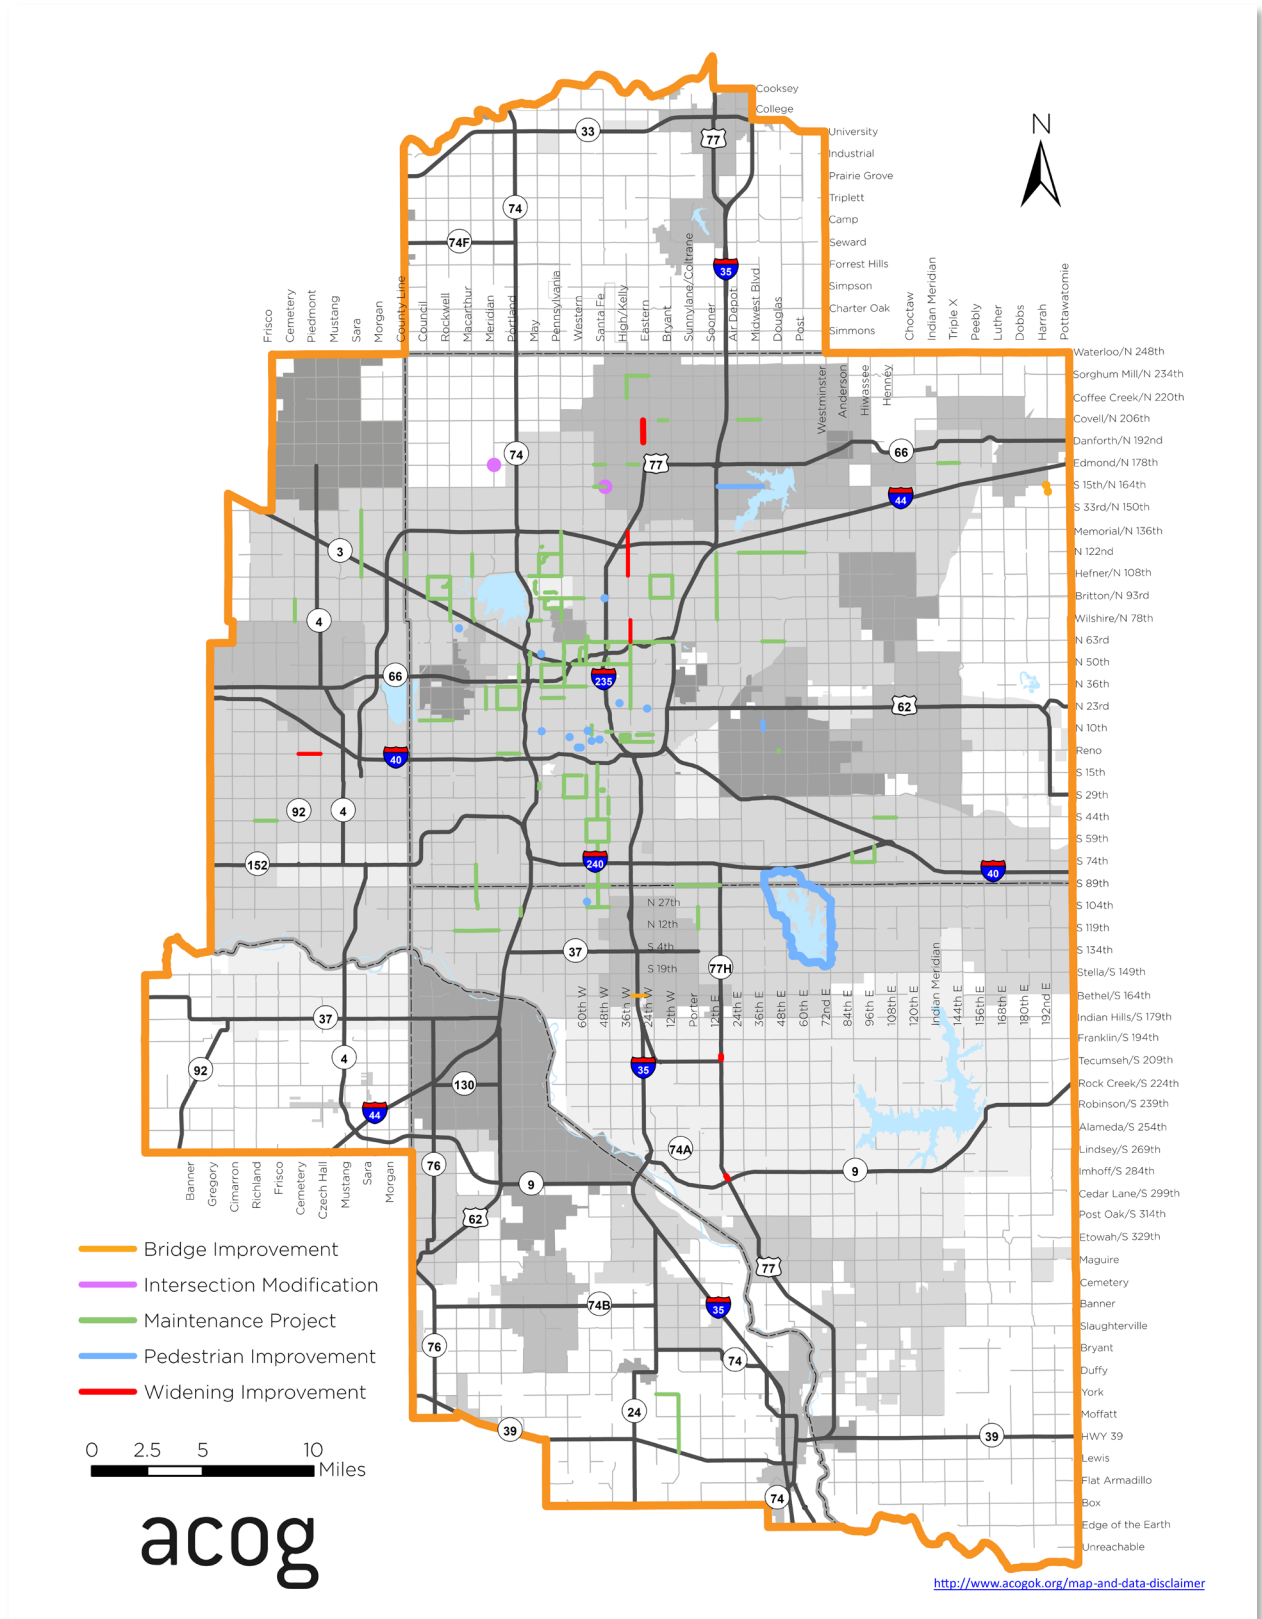

#### BICYCLE/PEDESTRIAN IMPROVEMENTS

[Table 4](#) lists the pedestrian improvements implemented in 2019. Approximately 16.74 miles of trails were added to the OCARTS area during CY 2019. There were three major bicycle/pedestrian improvements that were completed in CY 2019. One of them is the Mid-America Trail in Midwest City, one is the Spring Creek Trail extension and parking lot in Edmond, and the other one is the Lake Draper Trail in Oklahoma City.

#### PUBLIC TRANSIT IMPROVEMENTS

A complete summary of public transit improvements implemented by COTPA and City of Norman in CY 2019 can be found in [Attachment 1](#).
