Chair

Ray Poland
Jones City Mayor

Vice-Chair

Mark Hamm
Moore Councilmember

Secretary/Treasurer

Matt Dukes
Midwest City Mayor

Executive Director

Mark W. Sweeney, AICP

association of central oklahoma governments

4205 N. Lincoln Blvd. | Oklahoma City, OK 73105 | 405.234.2264 | acogok.org

GWPC AGENDA:

THURSDAY, APRIL 28, 2022, 2:30 P.M.

acog

THE GARBER-WELLINGTON ASSOCIATION POLICY COMMITTEE WILL HOLD A REGULAR MEETING ON THURSDAY, APRIL 28, AT ACOG IN THE OKLAHOMA BOARD ROOM (FORMERLY ACOG BOARD ROOM) 4205 N. LINCOLN BLVD., OKLAHOMA CITY, OKLAHOMA.

PLEASE NOTIFY ACOG AT 405-234-2264 (TDD/TTY CALL 7-1-1 STATEWIDE OR EMAIL title.vi@acogok.org) BY 5 P.M. MONDAY, APRIL 25, IF YOU REQUIRE ACCOMMODATIONS PURSUANT TO THE AMERICANS WITH DISABILITIES ACT OR SECTION 504 OF THE REHABILITATION ACT.

AGENDA

1. CALL TO ORDER ([ATTACHMENT 1](#))
2. APPROVAL OF DECEMBER 16, 2021, MINUTES ([ATTACHMENT 2](#))

STAFF REPORT: John Harrington, Water Resources Director
For information only.
 - A. DROUGHT UPDATE ([ATTACHMENT 3-A](#))
 - B. SANDSTONE MAPPING UPDATE ([ATTACHMENT 3-B](#))
 - C. NORTH CANADIAN RIVER PROJECT - STATE ARPA APPLICATION
([ATTACHMENT 3-C](#))
4. PROGRESS REPORT: John Harrington, Water Resources Director ([ATTACHMENT 4](#))
For information only.
5. NEW BUSINESS
6. ADJOURNMENT

NEXT MEETING:
June 30, 2022 at 2:30 p.m.

SUBJECT:

MINUTES OF THE GARBER-WELLINGTON ASSOCIATION POLICY COMMITTEE MEETING

DATE:

DECEMBER 16, 2021

The regularly scheduled meeting of the Garber-Wellington Association Policy Committee convened at 2:41 p.m. on December 16, 2021 in the Association of Central Oklahoma Governments (ACOG) Board Room, 4205 N. Lincoln Boulevard, Oklahoma City, Oklahoma. The meeting was held as indicated by a notice filed in advance with the Oklahoma County Clerk and by notice posted at the ACOG offices at least twenty-four hours prior to the meeting.

PRESIDING

Hon. Ray Poland, Chairman

CITY/AGENCY

Jones City

POLICY COMMITTEE MEMBERS PRESENT IN-PERSON

Hon. Mark Hamm, Councilmember

Moore

Hon. Ken Blasdel, Councilmember

Piedmont

Hon. Mary Smith, Vice-Mayor

Tuttle

Hon. Rod Cleveland, Commissioner of

Cleveland County

POLICY COMMITTEE MEMBERS ABSENT

Hon. Nikki Lloyd, Mayor

Bethany

Hon. Bruce Wallace, Trustee

Calumet

Hon. Chad Williams, Councilmember

Choctaw

Hon. Floyd Eason, Mayor

Del City

Hon. Josh Moore, Councilmember

Edmond

Hon. Matt White, Mayor

Mark W. Sweeney
 John M. Sharp
 John Harrington
 Beverly Garner
 Jimmy Smith

POSITION

Executive Director
 Deputy Director
 Water Resources Director
 Executive Assistant
 IT Operations Specialist

1. CALL TO ORDER

Chairman Ray Poland, Jones City, called the meeting to order at 2:41 p.m.

2. APPROVAL OF MINUTES - OCTOBER 28, 2021

Director Mark Hamm, Moore, made a motion to approve the October 28, 2021 Garber-Wellington Association Policy Committee minutes. Director Mary Smith, Tuttle, seconded the motion. The motion carried unanimously.

3. STAFF REPORT**A. DROUGHT UPDATE**

During November 2021 drought intensified in Oklahoma. By December 2021, 87 percent of the state was in abnormally dry conditions or worse. By December 2021, 60 percent of the state was in moderate drought conditions or worse, affecting approximately 1,160,899 people in Oklahoma.

Predictions that the flash drought in Oklahoma would intensify came true. The drought in Oklahoma that started in September has continued and is now expanding to the southeast into Arkansas and East Texas.

Some good news is that groundwater levels recorded from the Spencer, Oklahoma Mesonet station are still at the highest level in ten years, indicating the aquifers are also full. However, static water levels have fallen 1.5 feet since last summer. Recharge to the aquifer continues to be poor. There has been essentially no significant recharge to the aquifer since last July.

We also expect to have La Niña conditions until spring 2022, making 2021 a year where we had dual La Niña events. La Niña winters set up dry conditions that can lead into drought. These conditions may persist until May, interfering with normal spring precipitation.

B. 2021 GOVERNOR’S WATER CONFERENCE

The annual Governor’s Water Conference highlights water issues from across the state. The 42nd conference attracted hundreds of water officials and citizens who share an avid interest in Oklahoma’s water resources management, development, and protection.

Hot topics included infrastructure funding through new federal funding initiatives, including the Infrastructure Investment and Jobs Act (IIJA) and the American Rescue Plan Act (ARPA) of 2021. The medical marijuana industry and its impact on Oklahoma’s water was also discussed, and it was noted that the 2025 Comprehensive Water Plan was now given the green light to start the meeting processes and data gathering like the 2012 Plan. In addition to the Plan is a comprehensive approach to floodplain management.

C. SANDSTONE MAPPING UPDATE

The multi-year sandstone mapping project funded by the 604(b) grant continues. The 2019 604(b) project in the Edmond area extends the previous 2018 604(b) work northward.

All eight cross-sections have been completed. Over 125 wells have been correlated in this project so far; at completion about 250 wells will probably be correlated. Cross sections go through the Nichols Hills and Edmond well fields.

Sand thickness (Isopach) maps will now be generated. The sand thickness (isopach) maps will focus on extending the north-trending drilling area in Jones City and Choctaw. This work is expected to be completed in spring 2022.

The 2020 604(b) (Guthrie and Purcell Areas) Quality Assurance Project Plans have been submitted.

4. PROGRESS REPORT

John Harrington pointed out that the progress report was available for review in the agenda.

5. NEW BUSINESS

None

6. ADJOURNMENT

There being no further business, the meeting adjourned at 2:57 p.m.

ATTACHMENT 3-A

SUBJECT:
DROUGHT UPDATE

DATE:
APRIL 28, 2022

FROM:
JOHN HARRINGTON
Water Resources Director

INFORMATION:

Spring 2022 is starting out cold and dry. Exceptional drought that covered the Panhandle has now spread eastward into the western third of the state.

Although the beginning of February saw a record snowfall, this translated into little or no real moisture overall. Most of Central Oklahoma shows at least 30 days since significant (>0.25") rainfall has been recorded. The Oklahoma Panhandle is beginning to experience dust storms; Kenton, OK has 233 days since the last rain.

Recharge to the aquifer has been essentially zero since last July. Static water levels recorded at the Spencer Mesonet station are starting to retreat now from the decade high.

La Niña effects will continue to affect us for the short term. Long term models suggest that La Niña will last through the end of the year.

ACTION REQUESTED:
For information only.

ATTACHMENT 3-B

SUBJECT:
SANDSTONE MAPPING UPDATE

DATE:
APRIL 28, 2022

FROM:
JOHN HARRINGTON
Water Resources Director

INFORMATION:

The multi-year sandstone mapping project funded by the 604(b) grant will wrap up in April 2022. The 2019 604(b) project in the Edmond area extends the previous 2018 604(b) work northward.

All eight cross-sections have been completed. About 455 wells have been correlated in this project. Some of the cross sections go through the Nichols Hills and Edmond well fields.

Sand thickness (isopach) maps are being generated. The maps extend the north-trending drilling area in the Town of Jones City and City of Choctaw.

The 2020 604(b) (Guthrie and Purcell Areas) Quality Assurance Project Plans have been approved by the U.S. Environmental Protection Agency.

ACTION REQUESTED:

ATTACHMENT 3-C

SUBJECT:

NORTH CANADIAN RIVER PROJECT - STATE ARPA APPLICATION

DATE:

APRIL 28, 2022

FROM:

JOHN HARRINGTON

Water Resources Director

INFORMATION:

ACOG has applied for the State allocated American Rescue Plan Act (ARPA) funding to develop the North Canadian River Dissolved Oxygen Model. This project is a basin-wide approach for a wasteload allocation study on the North Canadian River in Canadian, Oklahoma, and Pottawatomie Counties in Central Oklahoma.

Like a previous ACOG wasteload allocation study on the Canadian River to the south, the study will develop a mathematical model that will accurately simulate water quality in the streams under critical conditions. This model will then be used to generate simulations for the purpose of determining appropriate permit limits for point source discharges on the river.

As in the previous Canadian River study, the participants in the study will be the municipalities which are dischargers to the North Canadian River. This includes Oklahoma City, Midwest City, Del City, Choctaw, Harrah, El Reno, Town of Jones City, Yukon, and Shawnee. Most of these entities are members of ACOG, a substate 208 agency.

Associated agencies which will review the project are the Oklahoma Department of Environmental Quality (ODEQ) and the US Environmental Protection Agency (EPA). The proposed budget will be \$1.5 million for the three-year project.

SUBJECT:
PROGRESS REPORT

DATE:
APRIL 28, 2022

FROM:
JOHN HARRINGTON
Water Resources Director

INFORMATION:

ACOG Drought Program

Spring 2022 is starting out cold and dry. Exceptional drought that covered the Panhandle has now spread eastward into the western third of the state.

Although the beginning of February saw a record snowfall, this translated into little or no real moisture overall. Most of Central Oklahoma shows at least 30 days since significant ($>0.25"$) rainfall has been recorded. The Oklahoma Panhandle is beginning to experience dust storms; Kenton, OK has had 233 days since the last rain.

Recharge to the aquifer has been essentially zero since last July. Static water levels recorded at the Spencer Mesonet station are starting to retreat now from the decade high.

La Niña effects will continue to affect us for the short term. Long term models suggest that La Niña will last through the end of the year.

Since the last progress report, two monthly drought reports have been generated.

19604(b) - Stratigraphic Mapping Garber-Wellington Aquifer Northern Oklahoma County

The multi-year sandstone mapping project funded by the 604(b) grant will wrap up in April 2022. The 2019 604(b) project in the Edmond area extends the previous 2018 604(b) work northward.

All eight cross-sections have been completed. About 455 wells have been correlated in this project. Some of the cross sections go through the Nichols Hills and Edmond well fields.

Sand thickness (isopach) maps are being generated. The maps extend the north-trending drilling area in the Town of Jones City and the City of Choctaw.

20604(b) - Stratigraphic Mapping Garber-Wellington Aquifer Southern Logan County

As part of a 604(b) grant, staff will continue and extend net sand maps created in the 18604(b) and 19604(b) projects into southern Logan County and southern Cleveland County. This effort will allow drillers to focus their efforts in areas with more sandstone, thus increasing well capacity. This project will commence in late April 2022.

21604(b) - Geologic Modeling Garber-Wellington Aquifer

The FY18-20 604(b) mapping projects produced cross-sections and net sand isopach maps for most of the aquifer. These mapping programs utilized the Aquaveo GMS database structure, which integrates the GIS capabilities of ArcGIS with MODFLOW. To achieve an aquifer-wide database coverage and geologic model, additional data from the 2016 Norman area project must be integrated into the GMS database structure.

A geologic model for the entire aquifer will be produced, which can then be integrated into the groundwater models generated by the 2013-16 604(b) projects.

This project proposal has been approved by EPA as part of the 21604(b) grant program.

North Canadian River Project – State ARPA Application

ACOG has applied for the State allocated American Rescue Plan Act (ARPA) funding to develop the North Canadian River Dissolved Oxygen Model. This project is a basin-wide approach for a wasteload allocation study on the North Canadian River in Canadian, Oklahoma, and Pottawatomie Counties in Central Oklahoma.

Like a previous ACOG wasteload allocation study on the Canadian River to the south, the study will develop a mathematical model that will accurately simulate water quality in the streams under critical conditions. This model will then be used to generate simulations for the purpose of determining appropriate permit limits for point source discharges on the river.

As in the previous Canadian River study, the participants in the study will be the municipalities which are dischargers to the North Canadian River. This includes Oklahoma City, Midwest City, Del City, Choctaw, Harrah, El Reno, Town of Jones City, Yukon, and Shawnee. Most of these entities are members of ACOG, a substate 208 agency.

Associated agencies which will review the project are the Oklahoma Department of Environmental Quality (ODEQ) and the US Environmental Protection Agency (EPA). The proposed budget will be \$1.5 million for the three-year project.
