

RED DIRT RESILIENCY

A Plan for Stronger Infrastructure & Risk Reduction

The **Red Dirt Resiliency Plan** is a regional roadmap for Central Oklahoma to address challenges related to aging infrastructure, rising costs and severe weather. Led by the Association of Central Oklahoma Governments and shaped by local governments and regional partners, the plan outlines practical steps to help communities improve infrastructure, prepare for emergencies and plan for the future.

THE PLAN AT A GLANCE

8

COUNTIES IN CENTRAL OKLAHOMA

17

PRIORITY ACTIONS FOR REGIONAL
AND LOCAL CONSIDERATION

5

AREAS OF REGIONAL ACTION

Developed through data analysis and input from communities, agencies and regional stakeholders

WHY IT MATTERS

More Reliable Infrastructure

Identify vulnerabilities and plan improvements before problems with roads, water systems, utilities and public facilities become costly disruptions.

Ready for Oklahoma's Toughest Weather

Improve coordination and readiness for severe storms, flooding, extreme heat, drought, wildfires and winter weather.

Making Public Dollars Go Further

Encourage preventive maintenance, energy efficiency, shared resources and long-term investments that can reduce operating costs and repetitive repairs.

Safer, Easier Ways to Travel

Support better traffic operations, safer streets and practical transportation choices that connect people with jobs, services and opportunities.

Healthier Places to Live

Improve air and water quality, manage stormwater, expand tree canopy and invest in public spaces that provide multiple community benefits.

FIVE AREAS OF REGIONAL ACTION

- Transportation & Mobility
- Infrastructure & Energy
- Industry & Economic Development
- Environment & Natural Systems
- Emergency Management

TURNING THE PLAN INTO ACTION

The Red Dirt Resiliency Plan is a flexible resource, not a mandate or a commitment to implement every recommendation. Communities can use it to:

Identify local needs
and priority projects

Inform capital
planning and
infrastructure
decisions

Strengthen
coordination
with neighboring
communities and
regional partners

Explore funding,
technical assistance
and shared-service
opportunities

Incorporate resilience
and long-term cost
considerations into
existing plans
and projects

Implementation will depend on local priorities, available funding and voluntary participation. ACOG will support regional coordination, connect communities with information and resources, and share updates as projects and partnerships develop.
